

Parts and Wholes

50 Question Practice Guide (Based on Chapter 5: Sharing and Measuring)

Q1. In the story at the beginning of the chapter, Ikra and Samina have a single drawing sheet. If Ikra divides it in half, how many equal parts is the sheet divided into?

- A) 1 part
- B) 2 equal parts
- C) 3 equal parts
- D) 4 equal parts

Q2. Samina wants a bigger part of the paper and chooses 'two quarters' instead of 'one half'. Which part is actually bigger?

- A) One half is bigger
- B) Two quarters is bigger
- C) Both are equal
- D) It depends on the size of the paper

Q3. How do we write 'one half' using fraction symbols?

- A) $\frac{1}{4}$
- B) $\frac{1}{3}$
- C) $\frac{1}{2}$
- D) $\frac{2}{1}$

Q4. When an object is divided into 4 equal parts, each part is called a:

- A) Half
- B) Third
- C) Quarter
- D) Fifth

Q5. How do we write 'one quarter' using mathematical symbols?

- A) $\frac{1}{2}$
- B) $\frac{1}{4}$
- C) $\frac{4}{1}$
- D) $\frac{1}{3}$

Q6. If an object is divided into 5 equal parts, what is the fraction symbol for each individual part?

- A) $\frac{1}{2}$
- B) $\frac{1}{4}$
- C) $\frac{1}{5}$
- D) $\frac{5}{1}$

Q7. Sumedha's mother made a dhokla. When shared equally between Sumedha and Vinayak, how much does each person get?

- A) $\frac{1}{3}$
- B) $\frac{1}{4}$
- C) $\frac{1}{2}$
- D) A whole

Q8. Complete the statement from the chapter: '_____ halves of a dhokla make a whole dhokla.'

- | | |
|----------|---------|
| A) Three | B) Four |
| C) Two | D) One |

Q9. When Kumar joins Sumedha and Vinayak, the dhokla is divided equally among 3 people. What is each person's share?

- | | |
|------------------|------------------|
| A) $\frac{1}{2}$ | B) $\frac{1}{3}$ |
| C) $\frac{1}{4}$ | D) $\frac{1}{5}$ |

Q10. Sumedha's cousin Paridhi arrives next, making a total of 4 people. What fraction of the dhokla does each person receive now?

- | | |
|---------------|--------------|
| A) One-half | B) One-third |
| C) One-fourth | D) One-fifth |

Q11. Their neighbour Idha arrives, so the dhokla is shared among 5 people. What fraction does each person get?

- | | |
|------------------|------------------|
| A) $\frac{1}{3}$ | B) $\frac{1}{4}$ |
| C) $\frac{1}{5}$ | D) $\frac{1}{6}$ |

Q12. What happens to the size of each person's share of dhokla as more guests arrive?

- | | |
|-----------------------------|---------------------------|
| A) The share gets bigger | B) The share gets smaller |
| C) The share stays the same | D) The share doubles |

Q13. In which situation will Sumedha get a larger piece of dhokla?

- | | |
|------------------------------------|-------------------------------------|
| A) When shared among 9 people | B) When shared among 11 people |
| C) Both options give the same size | D) It depends on who the guests are |

Q14. How many pieces of $\frac{1}{6}$ would you need to combine to make one complete, whole dhokla?

- | | |
|-------------|-------------|
| A) 3 pieces | B) 4 pieces |
| C) 5 pieces | D) 6 pieces |

Q15. If Idha doesn't like dhokla and gives her share ($\frac{1}{5}$) to Sumedha, and Sumedha already had her own $\frac{1}{5}$ share, how much total dhokla does Sumedha have now?

- | | |
|------------------|------------------|
| A) $\frac{1}{5}$ | B) $\frac{2}{5}$ |
| C) $\frac{3}{5}$ | D) $\frac{1}{2}$ |

Q16. If Idha and Vinayak BOTH give their $\frac{1}{5}$ shares to Sumedha, who already has a $\frac{1}{5}$ share, what is Sumedha's total share?

- A) $\frac{2}{5}$
- B) $\frac{3}{5}$
- C) $\frac{4}{5}$
- D) $\frac{5}{5}$

Q17. Compare the fractions $\frac{1}{5}$ and $\frac{1}{8}$. Which statement is correct?

- A) $\frac{1}{5}$ is smaller than $\frac{1}{8}$
- B) $\frac{1}{5}$ is greater than $\frac{1}{8}$
- C) $\frac{1}{5}$ is equal to $\frac{1}{8}$
- D) They cannot be compared

Q18. Fill in the blank: $\frac{1}{7}$ is _____ than $\frac{1}{9}$.

- A) greater
- B) smaller
- C) equal to
- D) half

Q19. Which of the following fraction comparisons is FALSE?

- A) $\frac{1}{2} > \frac{1}{3}$
- B) $\frac{1}{4} > \frac{1}{6}$
- C) $\frac{1}{10} > \frac{1}{5}$
- D) $\frac{1}{6} > \frac{1}{8}$

Q20. Idha has a garden split into 5 equal parts. In her original plan, she decides to plant Rose, Mogra, Lily, Marigold, and Jasmine equally. What fraction of the garden does Mogra occupy?

- A) $\frac{1}{2}$
- B) $\frac{1}{5}$
- C) $\frac{2}{5}$
- D) $\frac{5}{5}$

Q21. In Idha's revised plan, she replaces the Lily section with an extra Rose section because she has very few Lily seeds. Now, how many parts out of 5 are planted with Roses?

- A) 1 part
- B) 2 parts
- C) 3 parts
- D) 4 parts

Q22. In a later layout of Idha's garden, Roses take up 3 parts out of 5 equal parts. How do we write this fraction?

- A) $\frac{3}{5}$
- B) $\frac{5}{3}$
- C) $\frac{2}{5}$
- D) $\frac{1}{3}$

Q23. If Roses occupy 5 parts out of 5 equal parts ($\frac{5}{5}$), what does this represent?

- A) None of the garden
- B) Half of the garden
- C) The complete garden
- D) A quarter of the garden

Q24. You want to make a flower garden with seven equal sections. If Marigold occupies 1 section, what fraction is that?

- | | |
|------------------|------------------|
| A) $\frac{1}{2}$ | B) $\frac{1}{5}$ |
| C) $\frac{1}{7}$ | D) $\frac{7}{1}$ |

Q25. If Rose and Hibiscus each occupy 3 parts of a 7-part garden, what fraction does each occupy?

- | | |
|------------------|------------------|
| A) $\frac{3}{7}$ | B) $\frac{1}{7}$ |
| C) $\frac{2}{7}$ | D) $\frac{7}{3}$ |

Q26. Karan is a 'Dream Dosa Designer'. He makes a dosa divided into 4 equal quarters with 4 different toppings: Classic potato, Spicy onion, Chilly paneer, and Tangy tomato. What fraction is covered by Chilly paneer?

- | | |
|------------------|------------------|
| A) $\frac{1}{2}$ | B) $\frac{1}{3}$ |
| C) $\frac{1}{4}$ | D) $\frac{3}{4}$ |

Q27. A customer requests a dosa divided into 3 equal parts. 2 parts have Spicy onion topping and 1 part has Classic potato. What fraction of the dosa has Spicy onion?

- | | |
|------------------|------------------|
| A) $\frac{1}{3}$ | B) $\frac{2}{3}$ |
| C) $\frac{3}{2}$ | D) $\frac{2}{4}$ |

Q28. Karan creates a special dosa with 8 equal slices. 3 slices are Classic potato, 1 slice is Chilly paneer, and 4 slices are Tangy tomato. What fraction of the dosa is Tangy tomato?

- | | |
|------------------|------------------|
| A) $\frac{3}{8}$ | B) $\frac{1}{8}$ |
| C) $\frac{4}{8}$ | D) $\frac{8}{4}$ |

Q29. Meena has 8 diyas in total. The textbook asks to colour $\frac{1}{4}$ of her diyas red. To find $\frac{1}{4}$ of 8, into how many equal parts should the 8 diyas be grouped?

- | | |
|------------|------------|
| A) 2 parts | B) 4 parts |
| C) 8 parts | D) 1 part |

Q30. If you divide 8 diyas into 4 equal groups, how many diyas are in each group?

- | | |
|------------|------------|
| A) 1 diya | B) 2 diyas |
| C) 3 diyas | D) 4 diyas |

Q31. There are 12 cookies. If 3 children want to share them equally, what fraction of the total cookies will each child get?

- | | |
|------------------|------------------|
| A) $\frac{1}{2}$ | B) $\frac{1}{3}$ |
| C) $\frac{1}{4}$ | D) $\frac{1}{6}$ |

Q32. If 3 children share 12 cookies equally, how many cookies does each individual child receive?

- A) 2 cookies
- B) 3 cookies
- C) 4 cookies
- D) 6 cookies

Q33. If 6 children share the 12 cookies equally, what is the fraction and the number of cookies each child gets?

- A) $\frac{1}{6}$ of the cookies, which is 2 cookies
- B) $\frac{1}{2}$ of the cookies, which is 6 cookies
- C) $\frac{1}{4}$ of the cookies, which is 3 cookies
- D) $\frac{1}{3}$ of the cookies, which is 4 cookies

Q34. If 2 children share 12 cookies equally, how many cookies does each child get?

- A) 4 cookies
- B) 5 cookies
- C) 6 cookies
- D) 12 cookies

Q35. If 4 children share 12 cookies equally, how many cookies does each child get?

- A) 2 cookies
- B) 3 cookies
- C) 4 cookies
- D) 5 cookies

Q36. Simran calls 9 friends to her birthday party. $\frac{1}{3}$ of her friends receive a hairband as a return gift. How many friends receive a hairband?

- A) 2 friends
- B) 3 friends
- C) 4 friends
- D) 6 friends

Q37. Mummy asks to divide a box of 16 barfis into four equal parts. How many barfis are in each part (which is $\frac{1}{4}$ of the whole)?

- A) 2 barfis
- B) 4 barfis
- C) 6 barfis
- D) 8 barfis

Q38. Rohan has a piece of ribbon. Mohan's ribbon is one-fourth ($\frac{1}{4}$) as long as Rohan's ribbon. If Rohan's ribbon is 20 cm long, how long is Mohan's ribbon?

- A) 5 cm
- B) 10 cm
- C) 15 cm
- D) 4 cm

Q39. In an experiment, a rectangular paper is folded into 3 equal parts, and one part is colored ($\frac{1}{3}$). Then it is folded in half. The colored part now represents what fraction of the new smaller divisions?

- A) $\frac{1}{4}$
- B) $\frac{2}{5}$
- C) $\frac{2}{6}$
- D) $\frac{3}{6}$

Q40. Complete the equivalent fraction pattern from the paper-folding activity: $\frac{1}{3} = \frac{2}{6} = \frac{3}{9} = \underline{\hspace{1cm}}$

- A) $\frac{4}{10}$
- B) $\frac{4}{12}$
- C) $\frac{5}{12}$
- D) $\frac{4}{15}$

Q41. Complete the halving fraction pattern from the text: $\frac{1}{2} = \frac{2}{4} = \underline{\hspace{1cm}} = \frac{4}{8}$

- A) $\frac{3}{5}$
- B) $\frac{3}{6}$
- C) $\frac{2}{6}$
- D) $\frac{3}{8}$

Q42. According to the fraction chart in the textbook, how many quarters ($\frac{1}{4}$) are equal to one half ($\frac{1}{2}$)?

- A) 1 quarter
- B) 2 quarters
- C) 3 quarters
- D) 4 quarters

Q43. Is $\frac{2}{3}$ smaller than or greater than $\frac{1}{2}$?

- A) Smaller than $\frac{1}{2}$
- B) Greater than $\frac{1}{2}$
- C) Equal to $\frac{1}{2}$
- D) It cannot be determined

Q44. True or False: 'Ten pieces of $\frac{1}{10}$ make a complete whole.'

- A) True
- B) False

Q45. True or False: 'Three pieces of $\frac{1}{6}$ are equal to two pieces of $\frac{1}{8}$.'

- A) True
- B) False

Q46. How many pieces of $\frac{1}{8}$ make a quarter ($\frac{1}{4}$)?

- A) 2 pieces
- B) 3 pieces
- C) 4 pieces
- D) 8 pieces

Q47. When cutting a shape into halves or quarters, what is the absolute most important rule?

- A) The parts must look pretty
- B) The parts must be of equal size
- C) The line must be horizontal
- D) The shape must be a rectangle

Q48. If a square is divided into 3 columns, but the middle column is much wider than the outer two, does the shaded middle column represent $\frac{1}{3}$ of the square?

- A) Yes, because there are 3 parts
- B) No, because the parts are not equal in size
- C) Yes, because it is in the center
- D) No, because columns can't represent thirds

Q49. If an entire pizza is sliced into 6 equal parts, and you eat 4 parts, what fraction of the pizza did you eat?

A) $\frac{2}{6}$

B) $\frac{4}{6}$

C) $\frac{6}{4}$

D) $\frac{1}{6}$

Q50. What fraction is equivalent to $\frac{4}{6}$?

A) $\frac{1}{3}$

B) $\frac{2}{3}$

C) $\frac{3}{4}$

D) $\frac{1}{2}$

Answer Key & Explanations

Q1. Correct Answer: B) 2 equal parts

Explanation: When an object is divided in half, it means it is divided into 2 equal parts.

Q2. Correct Answer: C) Both are equal

Explanation: Two quarters ($\frac{1}{4} + \frac{1}{4}$) is equal to one half ($\frac{1}{2}$). They represent the exact same amount of the paper.

Q3. Correct Answer: C) $\frac{1}{2}$

Explanation: One half is written as $\frac{1}{2}$, where 1 is the part and 2 is the total number of equal parts.

Q4. Correct Answer: C) Quarter

Explanation: Each of the 4 equal parts of a whole object is called a quarter or one-fourth.

Q5. Correct Answer: B) $\frac{1}{4}$

Explanation: A quarter or one-fourth is written as $\frac{1}{4}$.

Q6. Correct Answer: C) $\frac{1}{5}$

Explanation: Dividing a whole into 5 equal parts means each part represents $\frac{1}{5}$ (one-fifth).

Q7. Correct Answer: C) $\frac{1}{2}$

Explanation: Sharing equally between 2 people means the dhokla is divided into two halves, so each gets $\frac{1}{2}$.

Q8. Correct Answer: C) Two

Explanation: Two halves ($\frac{1}{2} + \frac{1}{2}$) join together to make one complete whole.

Q9. Correct Answer: B) $\frac{1}{3}$

Explanation: When shared equally among 3 people, the whole is split into three equal parts, written as $\frac{1}{3}$.

Q10. Correct Answer: C) One-fourth

Explanation: Sharing among 4 people means dividing the dhokla into four equal parts, so each person gets one-fourth ($\frac{1}{4}$).

Q11. Correct Answer: C) $\frac{1}{5}$

Explanation: With 5 people sharing equally, each person gets $\frac{1}{5}$ of the complete dhokla.

Q12. Correct Answer: B) The share gets smaller

Explanation: As a whole is equally divided among a larger number of parts or people, each individual part becomes smaller.

Q13. Correct Answer: A) When shared among 9 people

Explanation: Sharing among fewer people (9 instead of 11) results in fewer divisions, so each piece is larger. Therefore, $\frac{1}{9}$ is greater than $\frac{1}{11}$.

Q14. Correct Answer: D) 6 pieces

Explanation: Six pieces of $\frac{1}{6}$ add up to $\frac{6}{6}$, which is exactly equal to 1 whole.

Q15. Correct Answer: B) $\frac{2}{5}$

Explanation: Sumedha's share + Idha's share = $\frac{1}{5} + \frac{1}{5} = \frac{2}{5}$ (two-fifths).

Q16. Correct Answer: B) $\frac{3}{5}$

Explanation: Sumedha gets $\frac{1}{5}$ (herself) + $\frac{1}{5}$ (Idha) + $\frac{1}{5}$ (Vinayak) = $\frac{3}{5}$ (three-fifths).

Q17. Correct Answer: B) $\frac{1}{5}$ is greater than $\frac{1}{8}$

Explanation: Since 5 is smaller than 8, dividing a whole into 5 parts gives larger pieces than dividing it into 8 parts. So, $\frac{1}{5} > \frac{1}{8}$.

Q18. Correct Answer: A) greater

Explanation: $\frac{1}{7}$ is greater than $\frac{1}{9}$ because dividing a whole into 7 equal parts yields larger sections than dividing it into 9 equal parts.

Q19. Correct Answer: C) $\frac{1}{10} > \frac{1}{5}$

Explanation: $\frac{1}{10}$ is smaller than $\frac{1}{5}$, not greater, because dividing a whole into 10 parts creates much smaller pieces than dividing it into 5 parts.

Q20. Correct Answer: B) $\frac{1}{5}$

Explanation: Since there are 5 plants divided equally into 5 parts, each plant occupies $\frac{1}{5}$ of the garden.

Q21. Correct Answer: B) 2 parts

Explanation: She plants Roses in two parts out of the 5 total parts, giving a total of $\frac{2}{5}$ for Roses.

Q22. Correct Answer: A) $\frac{3}{5}$

Explanation: Three parts out of five equal parts is written as $\frac{3}{5}$ (three-fifths).

Q23. Correct Answer: C) The complete garden

Explanation: $\frac{5}{5}$ means 5 out of 5 parts, which represents 1 whole, or the complete garden.

Q24. Correct Answer: C) 1/7

Explanation: One section out of 7 equal sections represents $\frac{1}{7}$ (one-seventh).

Q25. Correct Answer: A) 3/7

Explanation: Three parts out of seven equal parts is written as $\frac{3}{7}$.

Q26. Correct Answer: C) 1/4

Explanation: Since the dosa is divided into 4 equal parts, each topping covers exactly $\frac{1}{4}$ (one-quarter) of the dosa.

Q27. Correct Answer: B) 2/3

Explanation: Two parts out of three equal parts means $\frac{2}{3}$ of the dosa is topped with Spicy onion.

Q28. Correct Answer: C) 4/8

Explanation: Four slices out of eight equal slices means $\frac{4}{8}$ of the dosa is Tangy tomato (which is also equivalent to $\frac{1}{2}$).

Q29. Correct Answer: B) 4 parts

Explanation: To find $\frac{1}{4}$ of a collection, you must divide the total number of items into 4 equal groups.

Q30. Correct Answer: B) 2 diyas

Explanation: 8 divided by 4 equals 2. So, each of the 4 equal groups contains 2 diyas. Therefore, $\frac{1}{4}$ of 8 is 2.

Q31. Correct Answer: B) 1/3

Explanation: When shared among 3 children, each child gets $\frac{1}{3}$ of the total cookies.

Q32. Correct Answer: C) 4 cookies

Explanation: $\frac{1}{3}$ of 12 cookies is found by calculating $12 \div 3 = 4$ cookies.

Q33. Correct Answer: A) 1/6 of the cookies, which is 2 cookies

Explanation: Shared among 6 children means each gets $\frac{1}{6}$ of the total. $12 \div 6 = 2$ cookies.

Q34. Correct Answer: C) 6 cookies

Explanation: Each child gets half ($\frac{1}{2}$) of the cookies. $12 \div 2 = 6$ cookies.

Q35. Correct Answer: B) 3 cookies

Explanation: Each child gets $\frac{1}{4}$ of the cookies. $12 \div 4 = 3$ cookies.

Q36. Correct Answer: B) 3 friends

Explanation: There are 9 friends in the picture. $\frac{1}{3}$ of 9 is calculated as $9 \div 3 = 3$ friends.

Q37. Correct Answer: B) 4 barfis

Explanation: To find $\frac{1}{4}$ of 16, we divide 16 by 4, which equals 4 barfis per part.

Q38. Correct Answer: A) 5 cm

Explanation: Mohan's ribbon is $\frac{1}{4}$ of Rohan's, so $20 \text{ cm} \div 4 = 5 \text{ cm}$.

Q39. Correct Answer: C) $\frac{2}{6}$

Explanation: Folding 3 equal parts in half creates 6 equal parts in total. The original 1 colored part is now split into 2 smaller colored parts out of 6, so $\frac{1}{3} = \frac{2}{6}$.

Q40. Correct Answer: B) $\frac{4}{12}$

Explanation: Multiplying the numerator and denominator of $\frac{1}{3}$ by 4 gives $\frac{4}{12}$. This is an equivalent fraction.

Q41. Correct Answer: B) $\frac{3}{6}$

Explanation: The sequence shows equivalent fractions for a half. The missing term is $\frac{3}{6}$.

Q42. Correct Answer: B) 2 quarters

Explanation: Looking at the chart or computing mathematically, 2 pieces of $\frac{1}{4}$ equal $\frac{2}{4}$ which simplifies to $\frac{1}{2}$.

Q43. Correct Answer: B) Greater than $\frac{1}{2}$

Explanation: $\frac{2}{3}$ (about 66.7%) is greater than $\frac{1}{2}$ (50%). Alternatively, $\frac{2}{3}$ is more than half of 3.

Q44. Correct Answer: A) True

Explanation: True, because 10 pieces of $\frac{1}{10}$ add up to $\frac{10}{10}$ which equals 1 whole.

Q45. Correct Answer: B) False

Explanation: False. Three pieces of $\frac{1}{6}$ equals $\frac{3}{6} = \frac{1}{2}$. Two pieces of $\frac{1}{8}$ equals $\frac{2}{8} = \frac{1}{4}$. $\frac{1}{2}$ is not equal to $\frac{1}{4}$.

Q46. Correct Answer: A) 2 pieces

Explanation: Two pieces of $\frac{1}{8}$ equal $\frac{2}{8}$, which simplifies to $\frac{1}{4}$.

Q47. Correct Answer: B) The parts must be of equal size

Explanation: For a division to represent a true fraction like a half or a quarter, all the parts must be exactly equal in size.

Q48. Correct Answer: B) No, because the parts are not equal in size

Explanation: Fractions require equal parts. If the parts are unequal, a single part does not accurately represent the fraction $\frac{1}{3}$.

Q49. Correct Answer: B) $\frac{4}{6}$

Explanation: Eating 4 out of 6 equal parts means you consumed $\frac{4}{6}$ of the pizza.

Q50. Correct Answer: B) $\frac{2}{3}$

Explanation: Dividing both the numerator and denominator of $\frac{4}{6}$ by 2 gives $\frac{2}{3}$. Thus, $\frac{4}{6}$ and $\frac{2}{3}$ are equivalent fractions.
